(Omni Combination Conversion included with release)

## **Ritchie Industries Introduces a New Versatile way to Water**

Ritchie Industries, the leading manufacturer of automatic watering fountains, introduces an easy to install, lower drinking option to the Omni series. The Omni Combination Conversion easily replaces the access panel in existing Omni 5 and Omni 10 automatic waterers and delivers fresh, clean water to smaller animals using Ritchie's time proven valve for rapid refill.

The new Omni Combination Conversion (OCC) offers a fully insulated, impact resistant casing. The design allows for easy installation and maintenance and features smooth, rounded edges for the animals' safety. For cold weather climates, an Immersion Heater (sold separately) can be added to ensure a constant source of water in any climate. Featuring a 13 inch drinking height, the OCC is ideal for calves, sheep and other small animals, the OCC provides a versatile way to water your large and small animals at the same time.

The Omni Combination Conversion features a deep trough with a capacity of 2.7 gallons of water with a refill rate of 1.45 gallons a minute. It carries a 10-year warranty against manufacturing defects or corrosion. It is now available through Ritchie distributors nationwide and online at [Ritchiefount.com](http://Ritchiefount.com)

Since 1921, Ritchie has manufactured durable, dependable automatic fountains for many species of livestock, including beef, dairy, equine, swine, sheep and goats. The distinct Ritchie design has been the standard bearer of quality. Ritchie fountains continue to serve all sizes of operations with equipment designed to provide years of trouble-free use.
