

OmniMaster 4

BECAUSE A MIDSIZE WATERER DOESN'T MEAN MIDSIZE PERFORMANCE.

NEW! Requested by producers and perfected by Ritchie.

The Ritchie OmniMaster 4 is an all-climate hero for midsize operations that need a flexible watering solution. It puts everything producers love about the OmniMaster 8 into a smaller footprint to water up to 180 beef cattle or 90 dairy cows.

The Ritchie Situation

Producers with midsize herds asked for a larger-capacity watering solution that would work in a variety of pen configurations. We answered with the OmniMaster 4. Its 24-inch (61-cm) drink height and a center-valve design with two drinking areas give cattle easier access to more water than other similar-sized waterers – while giving you options for your pen layouts. And, like all Ritchies, the OmniMaster 4 is built tough with your herd's safety in mind.

Take a Closer Look at the OmniMaster 4

COMFORTABLE HEIGHT.
24-inch (61-cm) drinking height for animal comfort.

SAFE.
Rounded edges and smooth transitions are safe for animals and make for easy cleaning.

ALWAYS FULL.
A rapid-refill high-pressure valve keeps both sides of the waterer filled so animals stay hydrated.

EASY MAINTENANCE.
Producer-favorite flip-open top cover allows quick and easy access for maintenance.

FLEXIBLE SETUP.
Center-valve design gives you more flexibility in how you set up your pens.

ENERGY EFFICIENT.
Fully insulated casing boosts energy efficiency and durability.

HEAVY DUTY.
Wraparound edge and impact-resistant polyethylene construction protect from hooves and improved UV inhibitors extend life.

EASY TO CLEAN.
Large drain plug and recessed drain allow for fast and complete draining when cleaning.

ALL CLIMATE.
Stainless wraparound heated trough keeps water flowing even on the coldest days.

Warranty	10 years	10 years

Installation Tips

1

Choose a wind-protected location.

This will enhance the performance of the fountain and livestock will drink more in a protected area.

2

Start with a solid foundation.

Install your waterer on a concrete pad to prevent mud, erosion and shifting. This keeps footing safe and water clean.

3

Control mess naturally.

Spread ag lime around the concrete pad to further reduce mud, neutralize odors naturally and improve drainage. It's simple, effective and low cost.
